Outreach Considerations

- **Hyper-Local Presence:** Companies like **Guardian Roofing** and **ServiceMaster by Elite** specifically market their presence *inside* the Village of La Grange (60525), which often requires specific village licensing for projects.
- **Industrial vs. Residential:** If you are targeting larger-scale contracts, **A-1 Commercial Roofing** focuses specifically on flat-roof industrial and warehouse assets throughout the Midwest industrial corridor.
- **Storm Response:** **HomeHero Roofing** and **Proliance** are highly active in "storm chasing" or insurance-claim-driven leads in the Western Suburbs, often responding to wind and hail damage reports.

Would you like me to pull the specific **building permit data** or **recent local code violations** for these zip codes to help identify high-intent properties for these contractors?
