Expanding your outreach to the 600xx (North/Northwest), 602xx (Evanston), and 604xx (South/Southwest) zip code clusters provides a much larger market for industrial and high-value residential leads.

Below is the contact directory for the top-rated contractors in these regions, ranked by market presence and **Better Business Bureau (BBB)** or **Angi Super Service** standings.

North & Northwest Suburbs (600xx, 602xx)

Includes: Evanston, Skokie, Arlington Heights, Glenview, and Northbrook.

Company Name	Principal / Key Contact	Telephone Number	Contact Point / Email	Rank

PuroClean (Orland Park)	Tech Director	(708) 409-9400	via puroclean.com	Water Mitigation Elite

Regional Outreach Strategy

- The "North Shore" Professionalism (600xx/602xx):**
 Companies in the North Shore (Evanston, Glenview) often deal with higher-end residential and historical properties. When contacting **Restoration 1** or **Euclid**, emphasize the **technical accuracy** of your lead vetting. They are often more concerned with property preservation than "storm-chasing" volume.
- The "Joliet/Orland" Volume (604xx):**
 The South Suburbs have seen significant storm activity recently. Firms like **Great Roofing** and **SERVPRO Orland Park** are high-volume machines. They value **speed-to-lead** more than anything else. Your "15-minute call-back" value proposition will resonate most with this group.
- Commercial/Industrial Angle:**
Matthews Roofing and **ATI Restoration** are heavy hitters in the industrial space. Since you track metal fabricating firms and manufacturing companies, these two firms should be your primary targets for **B2B technical leads** or "Modernization-as-a-Service" (MaaS) referrals.

Next Step: I can integrate these names into your **Quantum Prairie Intelligence** strategic plan to help project your lead volume targets for these specific territories. Would you like me to do that?
